

Feature Overview

Your complete trading command centre

Sunny Capitals plugs straight into your own Notion trade log and turns it into a live command centre — real-time performance, prop-firm risk & pass tracking, edge analysis, discipline scoring, AI coaching, and an automatic daily briefing. It runs locally, reads your data live from Notion, and updates its interface automatically over time.

Setup & Data

- Guided 4-step setup wizard with live Notion connection testing
- Live sync from your own Notion (Accounts + Trades)
- One-click refresh with a “Synced” confirmation
- Runs locally — your data never leaves your machine
- Automatic over-the-air UI updates + “update available” banner

Themes & Interface

- Three full colour themes: Light Steel, Classic, Deep Steel
- Clean multi-page layout with a collapsible sidebar
- Custom dashboard name & tagline
- Comfortable / compact density & adjustable 3D panel depth
- Accounts grouped by prop firm (dropdowns + phase badges)
- Pin-note, back-to-top, theme-aware scrollbars, mobile fallback

Live Alerts

- Daily loss-limit warnings (approaching & hit)
- Revenge-trade detector → jumps to that day in the log
- Milestone confetti on P&L milestones

Performance Overview

- 13 KPIs: win rate, net/gross P&L, profit factor, expectancy, avg win/loss, RR, drawdown, risk, commission, totals
- Header quick-stats, current streak & rule-adherence line

Targets & Limits

- Profit-target, max-drawdown & daily-loss gauges per account

- Challenge pass projection — trading days to target + ETA

Charts & Visuals

- Equity curve, P&L distribution, monthly P&L
- Day-of-week & time-of-day edge
- RR scatter & % risk distribution
- Session cards, pair / direction / mistakes / confluence breakdowns
- Calendar heatmap — click any day for a full review popup
- Recent-streak strip & account comparison

Edge Analysis

- Data-quality panel (how complete your logging is)
- Setup / pair / session expectancy matrices with verdicts
- Rule adherence: clean vs rule-broken & cost of mistakes

Trade Log

- Sortable, searchable table of every trade
- Expandable rows with trade screenshots & notes from Notion
- One-click “copy trade” & CSV export

Pre-Trade Checklist

- Fully editable — add, rename or remove your own sections & items
- Saved per user; progress tracking, mantras & new-session reset

Coaching & Reports

- AI trade review: strengths, weaknesses, action plan, scores
- Weekly report with real PDF download
- Automatic daily morning briefing

Settings — 5 tabs

- Appearance — name, tagline, theme, font, density, depth
- Display & Defaults — default page/account/period, currency, number & date format, week start, timezone
- Trading Rules — revenge window, loss-warning %, expectancy sample, milestones

- Data & Connection — auto-refresh, CSV export, reset
- Privacy — blur all balances for screen-sharing (Shift+P)

Private & Secure

- Local-only server, locked to your machine
- Hardened against cross-site & injection attacks
- Privacy mode hides balances for recording or sharing
